Acquisitions List
September 2020
New Books and Journal Articles

Liste d’acquisitions
Septembre 2020
Nouveaux livres et articles de revues
How to borrow items from the list below:

As a member of the NATO HQ staff you can borrow books (Media: Book) for one month, journals (Media: Article) and reference works (Collection Type: Reference Collection) for one week. Individuals not belonging to NATO staff can borrow books through their local library via the interlibrary loan system.

How to obtain the Multimedia Library publications:

All Library publications are available on the NATO Internet website at https://www.nato.int/library.

Disclaimer:

NATO is not responsible for the content of the publications cited in this Acquisitions List. Furthermore, the views and opinions of the authors expressed in these documents do not necessarily state or reflect those of NATO.

Comment emprunter les documents cités ci-dessous:

En tant que membre du personnel de l’OTAN vous pouvez emprunter les livres (Media : Book) pour un mois, les revues (Media : Article) et les ouvrages de référence (Collection Type : Reference Collection) pour une semaine. Les personnes n’appartenant pas au personnel de l’OTAN peuvent s’adresser à leur bibliothèque locale et emprunter les livres via le système de prêt interbibliothèques.

Comment obtenir les publications de la Bibliothèque multimédia:

Toutes les publications de la Bibliothèque sont disponibles sur le site Internet de l’OTAN, à https://www.nato.int/library.

Clause de non-responsabilité:

Le contenu des publications mentionnées dans cette liste d’acquisitions n’engage pas la responsabilité de l’OTAN. De plus, les points de vue et opinions des auteurs, tels qu’exprimés dans ces documents ne reflètent pas nécessairement ceux de l’OTAN.

ALLIANCES
Title: Arguing about Alliances: The Art of Agreement in Military-Pact Negotiations
Author: Poast, Paul
Published: Ithaca, NY: Cornell University Press, 2019
Physical Description: xi, 244 pages : illustrations ; 24 cm.
Notes: From the inability of European powers to form an alliance that would stop Hitler in the 1930s, to the present inability of Ukraine to join NATO, states frequently attempt and fail to form alliance treaties. This book sheds new light on the purpose of alliance treaties by recognizing that alliance treaties come from negotiations and that these negotiations can end without an agreement.

ARTIFICIAL INTELLIGENCE
Title: Turning Point: Policymaking in the Era of Artificial Intelligence
Author: West, Darrell M., 1954-
Additional Author: Allen, John R., 1953-
Published: Washington: Brookings Institution Press, 2020
Physical Description: xvi, 277 pages : illustrations ; 24 cm.
Notes: Includes index.
Notes: The book offers major recommendations for actions that governments, businesses, and individuals can take to promote trustworthy and responsible artificial intelligence. Their recommendations include: creation of ethical principles, strengthening government oversight, defining corporate culpability, establishment of advisory boards at federal agencies, using third-party audits to reduce biases inherent in algorithms, tightening personal privacy requirements, using insurance to mitigate exposure to AI risks, broadening decision-making about AI uses and procedures, penalizing malicious uses of new technologies, and taking pro-active steps to address how artificial intelligence affects the workforce.

The Chinese Communist Party is determined to reshape the world in its image. The party is not interested in democracy. It sees only a bitter ideological struggle with the West, dividing the world into those who can be won over and enemies. Many political and business elites have already been lured to their corner; others are weighing up a devil’s bargain. Through its enormous economic power and covert influence operations, China is now weakening global institutions, aggressively targeting individual corporations, and threatening freedom of expression from the arts to academia. At the same time, Western security services are increasingly worried about incursions into our communications infrastructure. Combining meticulous research with unique insights, this book exposes the Chinese Communist Party’s global program of subversion, and the threat it poses to democracy.

How do aspiring and established rising global powers respond to conflict? Using China, the book studies its response to wars and rivalries in the Middle East from the Cold War to the present. Since the People’s Republic was established in 1949, China has long been involved in the Middle East and its conflicts, from exploiting or avoiding them to their management, containment or resolution. Using a conflict and peace studies angle, the author adopts a broad perspective on Chinese engagement by looking at its involvement in the region’s conflicts including Israel/Palestine, Iraq before and after 2003, Sudan and the Darfur crisis, the Iranian nuclear deal, the Gulf crisis and the wars in Syria, Libya and Yemen. The book reveals how a rising global and non-Western power handles the challenges associated with both violent and non-violent conflict and the differences between limiting and reducing violence alongside other ways to eliminate the causes of conflict and grievance.

DEMOCRACY
Title: Twilight of Democracy : The Failure of Politics and the Parting of Friends
Author: Applebaum, Anne, 1964-
Published: London : Allen Lane, 2020
Physical Description: 206 pages ; 23 cm.
Notes: In the years just before and after the fall of the Berlin Wall, people from across the political spectrum in Europe and America celebrated a great achievement, felt a common purpose and, very often, forged personal friendships. Yet over the following decades the euphoria evaporated, the common purpose and centre ground gradually disappeared, extremism rose once more and eventually - as this book compellingly relates - the relationships soured too. The author traces this history in an unfamiliar way, looking at the trajectories of individuals caught up in the public events of the last three decades. When politics becomes polarized, which side do you back ? If you are a journalist, an intellectual, a civic leader, how do you deal with the re-emergence of authoritarian or nationalist ideas in your country ? When your leaders appropriate history, or pedal conspiracies, or eviscerate the media and the judiciary, do you go along with it ? This essay combines the personal and the political in an original way and brings a fresh understanding to the dynamics of public life in Europe and America, both now and in the recent past.

DEMOCRACY--HISTORY
Title: The Decline and Rise of Democracy : A Global History from Antiquity to Today
Author: Stasavage, David
Published: Princeton, NJ. : Princeton University Press, 2020
Physical Description: xii, 406 pages : illustrations ; 24 cm.
Series: The Princeton Economic History of the Western World
Notes: Historical accounts of democracy's rise tend to focus on ancient Greece and pre-Renaissance Europe. This book draws from global evidence to show that the story is much richer - democratic practices were present in many places, at many other times, from the Americas before European conquest, to ancient Mesoptamia, to precolonial Africa. Delving into the prevalence of early democracy throughout the world, the author makes the case that understanding how and where these democracies flourished - and when and why they declined - can provide crucial information not just about the history of governance, but also about the ways modern democracies work and where they could manifest in the future.

**DRONE AIRCRAFT--SOCIAL ASPECTS**

**Title:** Drones : The Brilliant, the Bad, and the Beautiful

**Author:** Miah, Andy, 1975-

**Published:** Bingley, UK : Emerald Publishing, 2020

**Physical Description:** xvi, 175 pages ; 20 cm.

**Edition:** First edition.

**Series:** SocietyNow

**Notes:** Bibliography: p. 153-172. Includes index.

**Notes:** Against the backdrop of an increasingly dynamic world, driven by rapid digital innovation and technological advances, drones are becoming prolific within society. The author delivers a comprehensive analysis of the wide-reaching applications of drones, as well as a critical interrogation of the social, cultural and moral issues that they provoke. Delving into philosophical discussions about the implications of drone technology, this book shines a light on their real-world applications, the challenges they pose, and what they reveal about the human condition, when faced with a future of autonomous, intelligent robots.

**EUROPEAN INTEGRATION**

**Title:** Ever Looser Union ? : Differentiated European Integration

**Author:** Schimmelfennig, Frank, 1963-

**Additional Author:** Winzen, Thomas

**Published:** Oxford, UK : Oxford University Press, 2020

**Physical Description:** xii, 226 pages : illustrations ; 24 cm.

**Edition:** First edition.

**Notes:** Bibliography: p. 209-217. Includes index.

**Notes:** Differentiated integration has become a durable feature of the European Union and is a major alternative for its future development and reform. This book provides a comprehensive conceptual, theoretical, and empirical analysis of differentiation in European integration. It explains differentiation in EU treaties and legislation in general and offers specific accounts of differentiation in the recent enlargements of the EU, the Eurozone crisis, the Brexit negotiations, and the integration of non-member states. The book introduces differentiated integration as a legal instrument that European governments use regularly to overcome integration deadlock in EU treaty negotiations and legislation. Differentiated integration follows two main logics. Instrumental differentiation adjusts integration in the heterogeneity of economic preferences and capacities, particularly in the context of enlargement. By contrast, constitutional differentiation accommodates concerns about national self-determination. Whereas instrumental differentiation mainly affects poorer (new) member states, constitutional differentiation offers wealthier and nationally oriented member states opt-outs from the integration of core state powers. The book shows that differentiated integration has facilitated the integration of new policies, new members, and even non-members. It has been mainly 'multi-speed' and inclusive. Most differentiations end after a few years and do not discriminate against
member states permanently. Yet differentiation is less suitable for reforming established policies, managing disintegration, and fostering solidarity; and the path-dependency of core state power integration may lead to permanent divides in the Union.

**HACKING--POLITICAL ASPECTS**  
**Title:** The Hacker and the State : Cyber Attacks and the New Normal of Geopolitics  
**Author:** Buchanan, Ben  
**Published:** Cambridge, MA : Harvard University Press, 2020  
**Physical Description:** 412 pages ; 22 cm.  
**Notes:** Includes index.  
**Notes:** Ever since WarGames, we have been bracing for the cyberwar to come, conjuring images of exploding power plants and mass panic. But while cyber attacks are now disturbingly common, they don't look anything like we thought they would. Packed with insider information based on interviews, declassified files, and forensic analysis of company reports, this book sets aside fantasies of cyber-annihilation to explore the real geopolitical competition of the digital age. Tracing the conflict of wills and interests among modern nations, the author reveals little-known details of how China, Russia, North Korea, Britain, and the United States hack one another in a relentless struggle for dominance. His analysis moves deftly from underwater cable taps to underground nuclear sabotage, from blackouts and data breaches to billion-dollar heists and election interference. The author brings to life this continuous cycle of espionage and deception, attack and counterattack, destabilization and retaliation. He explains why cyber attacks are far less destructive than we anticipated, far more pervasive, and much harder to prevent. With little fanfare and far less scrutiny, they impact our banks, our tech and health systems, our democracy, and every aspect of our lives. Quietly, insidiously, they have reshaped our national-security priorities and transformed spycraft and statecraft. The contest for geopolitical advantage has moved into cyberspace. The United States and its allies can no longer dominate the way they once did. The nation that hacks best will triumph.

INFORMATION WARFARE

Title: Information Warfare in the Age of Cyber Conflict
Additional Author: Whyte, Christopher, 1988-, ed.
Additional Author: Thrall, A. Trevor, ed.
Additional Author: Mazanec, Brian M., ed.
Published: Abingdon, UK : Routledge, 2021
Physical Description: xix, 249 pages ; 25 cm.
Series: Routledge Studies in Conflict, Security and Technology
Notes: Includes index.
Notes: This book examines the shape, sources and dangers of information warfare (IW) as it pertains to military, diplomatic and civilian stakeholders. Cyber warfare and information warfare are different beasts. Both concern information, but where the former does so exclusively in its digitized and operationalized form, the latter does so in a much broader sense : with IW, information itself is the weapon. The present work aims to help scholars, analysts, and policymakers understand information warfare within the context of cyber conflict. Specifically, the chapters in the volume address the shape of influence campaigns waged across digital infrastructure and in the psychology of democratic populations in recent years by belligerent state actors, from the Russian Federation to the Islamic Republic of Iran. In marshalling evidence on the shape and evolution of information warfare as a broad-scoped phenomenon aimed at societies writ large, the authors in this book present timely empirical investigations into the global landscape of influence operations, legal and strategic analyses of their role in international politics, and insightful examinations of the potential for democratic process to overcome pervasive foreign manipulation.

INSURGENCY

Title: Understanding Insurgent Resilience : Organizational Structures and the Implications for Counterinsurgency
Author: Henshaw, Andrew D, 1976-
Published: Abingdon, UK: Routledge, 2021
Physical Description: xv, 293 pages : illustrations ; 24 cm.
Series: Cass Military Studies
Notes: Includes index.
Notes: This book examines terrorist and insurgent organisations and seeks to understand how such groups persist for so long, while introducing a new strategic doctrine for countering these organisations. The work discusses whether familial or meritocratic insurgencies are more resilient to counterinsurgency pressures. It argues that it is not the type of organization that determines resilience, but rather the efficiency functions of social capital and trust, which have different natures and forms, within them. It finds that while familial insurgencies can challenge incumbents from the start, they weaken over time, whereas meritocracies will generally strengthen. The book examines four of the most enduring and lethal insurgent organizations : the Haqqani Network in Afghanistan, Lashkar-e-Taiba in Pakistan, Jemaah Islamiyah in Indonesia, and the Abu Sayyaf in the Philippines. The author breaks down each group into its formative strengths and vulnerabilities and presents a bespoke model of strategic counterintelligence that can be used to manipulate, degrade and destroy each organization.

INTERNATIONAL AGENCIES--LAW AND LEGISLATION
Title: Cases and Materials on the Law of International Organizations
Author: Worster, William Thomas
Published: Abingdon, UK : Routledge, 2021
Physical Description: xxvi, 450 pages ; 25 cm
Notes: Includes index.
Notes: In less than 100 years, international organizations have evolved from curiosities into keystones of international law. What began long ago as an unremarkable effort to coordinate a limited number of technical issues has grown into a global, multilevel, blended governing project with diverse competences in most fields of human endeavor and interests. Law graduates who enter the field of international law, as well as political science, international relations and diplomacy, are increasingly expected to have a strong knowledge of the law of international organizations. Beyond knowledge, graduates are also expected to be able to solve new emerging legal problems confronting organizations. This book introduces students to the law of international organizations through the careful study of the most recent cases and other materials from the International Court of Justice, United Nations Security Council and General Assembly, World Trade Organization, international criminal tribunals, European Union, European Court of Human Rights, International Labor Organization, various domestic courts and arbitral panels, and other bodies. In doing so, it undertakes a critical examination of legal rights and duties, exposing the fundamental questions that arise when addressing a range of issues within an organization. In order to provide the best foundation, the textbook focuses on several key topics: the law of treaties, creation of organizations, membership, powers of organizations, legal effects of their acts, organs, immunities and responsibility.

INTERNATIONAL RELATIONS
Title: Geopolitique du Covid-19 : ce que nous revele la crise du coronavirus
Author: Boniface, Pascal, 1956-
Published: Paris : Eyrolles, 2020
Physical Description: 189 pages ; 21 cm.
Notes: La crise du Covid-19 a suscite un tel choc dans l'opinion publique que beaucoup de commentateurs ont emis l'hypothese que plus rien ne serait comme avant. C'est qu'il s'agit d'un episode sans precedent, revelateur d'évolutions latentes et porteur de modifications structurelles dans les relations internationales. Passe l'effet de sideration, cet ouvrage revient sur ce 'moment' historique et nous eclaire sur les consequences geostrategiques de cette catastrophe sanitaire. Est-ce la fin du monde occidental, atteint dans son modele de reussite ? La Chine a-t-elle gagne dans le duel qui l'oppose plus que jamais aux Etats-Unis ? Cette crise balaye-t-elle definitivement le reve d'une Europe puissante on va-t-elle susciter le sursaut tant attendu et si souvent decu ? Se dirige-t-on vers davantage de multilateralisme ou vers une profusion d'unilateralisme ? Autant de questions de fond que l'auteur analyse avec lucidite pour nous aider a apprehender le 'monde d'apres'.

IRAN--FOREIGN RELATIONS
Title: L'Iran et ses rivaux : entre nation et révolution
Additional Author: Therme, Clément, ed.
Published: Paris : Passes Composées, 2020
Physical Description: 207 pages ; 20 cm.
Notes: Plus de quarante ans après la Révolution islamique de 1979, la question de l'intégration de l'Iran dans son environnement régional et de sa place au sein de la communauté internationale n'est toujours pas réglée. Pour le président Trump, la République islamique reste un 'État voyou'. Certains rivaux de l'Iran, comme Israël ou l'Arabie saoudite, alimentent le discours américain d'une anormalité de la République islamique. Vue de la rive arabe du golfe Persique, la problématique se pose de manière différente : il s'agit de contester l'ambition de l'Iran de parler au nom de l'ensemble des musulmans. Plus récemment, Téhéran est également devenu un partenaire de la Russie dans la lutte contre le jihadisme ; sans oublier que Paris et Ankara jouent leur propre partition. La nature de la politique de Téhéran n'a donc cesse de questionner les chercheurs.

IRAN--POLITICS AND GOVERNMENT
Title: Iran Reframed : Anxieties of Power in the Islamic Republic
Author: Bajoghli, Narges, 1982-
Published: Stanford, CA : Stanford University Press, 2019
Physical Description: x, 162 pages : illustrations ; 23 cm.
Series: Stanford Studies in Middle Eastern and Islamic Societies and Cultures
Notes: More than half of Iran's citizens were not alive at the time of the 1979 Revolution. Now entering its fifth decade in power, the Iranian regime faces the paradox of any successful revolution : how to transmit the commitments of its political project to the next generation. New media ventures supported by the Islamic Republic attempt to win the hearts and minds of younger Iranians. Yet members of this new generation - whether dissidents or fundamentalists - are increasingly skeptical of these efforts. This book offers unprecedented access to those who wield power in Iran as they debate and define the future of the Republic. Over ten years, the author met with men in Iran's Revolutionary Guard, Ansar Hezbollah, and Basij paramilitary organizations to investigate how their media producers developed strategies to court Iranian youth. Readers come to know these men - what the regime means to them and their anxieties about the future of their revolutionary project. Contestation over how to define the regime underlies all their efforts to communicate with the public. This book offers a multilayered story about what it means to be pro-regime in the Islamic Republic, challenging everything we think we know about Iran and revolution.

IRAQ--POLITICS AND GOVERNMENT
Title: Iraq since the Invasion : People and Politics in a State of Conflict
Additional Author: Sakai, Keiko, 1959- , ed.
Additional Author: Marfleet, Philip, 1948- , ed.
Published: Abingdon, UK : Routledge, 2020
Physical Description: xiv, 238 pages : illustrations ; 24 cm.
Notes: Includes index.
Notes: The book addresses the complex events and unexpected outcomes of military intervention by the United States and its allies in Iraq in 2003. Considering the long-term outcomes of military intervention, this volume examines economic collapse, societal disorder and increased regional conflict in Iraq. The work assesses the means by which American strategists imposed a new political order, generalising corruption, sectarian preference and ethnic cleansing, and stimulating mass population movements in and from Iraq. Mobilising a multi-disciplinary perspective, the book explores the rise and fall of Iraq's confessional leaders, the emergence of a popular movement for reform and the demands of young radicals focused upon revolutionary change. The product of years of intensive research by Iraqis and international scholars, this book considers how an initiative designed to produce 'regime change' favourable to the United States and its allies brought unprecedented influence for Iran - both in Iraq and the wider Gulf region. It inspects events in Kurdistan and the impacts of change on relations between Iraq and its neighbours.

Notes: Bibliography: p. 447-459.
Notes: Si la guerre du Liban (1975-1990) est le resultat de fractures sociales, economiques et politiques, parmi lesquelles une unite nationale fragile entre communautes chretiennes et musulmanes, elle tire egalement ses origines des tensions geopolitiques ou s'entremelent les interets palestiniens, israeliens, arabes et occidentaux. Ce livre analyse pour la premiere fois le conflit a travers la multiplicité de ses enjeux : le role des combattants, la resilience des civils, le fonctionnement des institutions, y compris miliciennes, ainsi que le poids des facteurs regionaux et internationaux. Ce retour sur la tragedie libanaise permet d'eclairer la logique des conflits mondialisés post-guerre froide, en ex-Yougoslavie, mais aussi au Moyen-orient. C'est en prenant en compte la dimension globale du conflit et en s'appuyant sur les recherches les plus recentes que les auteurs renouvellent l'histoire d'une guerre 'civile' dont les échos ressonnent jusqu'à nos jours.

LIBERALISM
Title: The False Promise of Liberal Order: Nostalgia, Delusion and the Rise of Trump
Author: Porter, Patrick, 1976-
Published: Cambridge, UK: Polity Press, 2020
Physical Description: viii, 253 pages; 22 cm.
Notes: Includes index.
Notes: In an age of demagogues, hostile great powers and trade wars, foreign policy traditionalists dream of restoring liberal international order. This order, they claim, ushered in seventy years of peace and prosperity and saw post-war America domesticate the world to its values. This book exposes the flaws in this nostalgic vision. International life is too dangerous and conflicted to be ordered liberally, and the world America made came about as a result of coercion and, sometimes brutal, compromise. To make peace, America struck bargains with authoritarian forces. Even in the Pax Americana, the gentlest order yet, ordering was rough work. Overstriving to spread capitalist democracy abroad led inadvertently to illiberal results, threatening democracy at home. As its power grew, Washington came to believe that order was exceptional and even permanent—a mentality that led to spiralling deficits, permanent war and Trump. Romanticizing the order makes it harder to adjust to today’s global disorder. Only by confronting the delusion of liberal order and adapting to current realities can the United States survive as a constitutional republic in a plural world.

MILITARY ASSISTANCE, AMERICAN—DEVELOPING COUNTRIES
Title: Aiding and Abetting: U.S. Foreign Assistance and State Violence
Author: Trisko Darden, Jessica
Published: Stanford, CA: Stanford University Press, 2020
Physical Description: xi, 198 pages: illustrations; 24 cm.
Notes: The United States is the world’s leading foreign aid donor. Yet there has been little inquiry into how such assistance affects the politics and societies of recipient nations. Drawing on four decades of data on U.S. economic and military aid, this book explores whether foreign aid does more harm than good. The author challenges longstanding ideas about aid and its consequences, and highlights key patterns in the relationship between assistance and violence. She persuasively demonstrates that many of the foreign aid policy challenges the U.S. faced in the Cold War era, such as the propelling up of dictators friendly to U.S. interests, remain salient today. Historical case studies of Indonesia, El Salvador, and South Korea illustrate how aid can uphold human freedoms or propagate human rights abuses. The book encourages both advocates and critics of foreign assistance to reconsider its political and social consequences by focusing international aid efforts on the expansion of human freedom.

MILITARY ATTACHES
Title: Defense Engagement since 1900 : Global Lessons in Soft Power
Additional Author: Kennedy, Greg, ed.
Published: Lawrence, KS : University Press of Kansas, 2020
Physical Description: vi, 312 pages ; 22 cm.
Series: Modern War Studies
Notes: Includes index.
Notes: There is more to defense than military might and more to the military than a fighting force. At a moment of global upheaval, domestic turmoil, and political uncertainty, this timely volume seeks to define and reframe the terms of defense engagement - the use of military capabilities to exert soft power (influence) as opposed to hard power (military force). This book is a work of applied military history that brings lessons of the past to bear on current issues. In a number of case studies spanning the twentieth century and the globe, the authors explore various dimensions of defense engagement. The contributors recast the role of a state's military from wielder of force to employer of power, and these chapters will prove critically important to today’s strategic thinkers, as democratic states increasingly contend with hybrid, subthreshold, and Gray Zone warfare.

MILITARY INTELLIGENCE--PERSIAN GULF REGION
Title: ISR & the Gulf : An Assessment
Institution: International Institute for Strategic Studies (GB)
Published: London : International Institute for Strategic Studies, 2019
Physical Description: 100 pages : illustrations ; 30 cm.
Notes: Includes index.
Notes: Intelligence, surveillance and reconnaissance (ISR) is today a core capability for the modern military, in peacetime and in war. ISR is and will remain a key enabler in the Gulf region in ongoing conflicts. There is still a reliance on the United States, and its ISR systems deployed in the Gulf, to facilitate ongoing operations and to provide situational awareness at the tactical, operational and strategic levels. However, even US ISR is finite, and there is growing demand for its resources in other regions. The Gulf Cooperation Council states have some ISR capacity, but this needs further development and improved exploitation to better address regional needs. The report considers the meaning of and requirements for intelligence, surveillance and reconnaissance in the context of the region. It examines the military needs and industrial aspirations of the Gulf Arab states regarding ISR, and the opportunities and risks these present.

MINORITIES--KOSOVO (REPUBLIC)
Title: Kosovo Divided : Ethnicity, Nationalism and the Struggle for a State
Author: Calu, Marius-Ionut
Published: London : I. B. Tauris, 2020
Physical Description: ix, 254 pages ; 24 cm.
Notes: Given the recent revival of nationalism in many parts of the world in tandem with new conflicts and forms of interventionism, this book uses the case of Kosovo to discuss some of key problems around contemporary practices of state-building. Based on exhaustive research and fieldwork, the author investigates how the management of plurality is a fundamental element of contemporary state-building seeking to build social cohesion, while for the new-born Kosovo it stands as vital symbol for its domestic sovereignty and legitimisation. With the aim of understanding why and in what ways the management of diversity has become a central element of state-building in post-conflict Kosovo, this study juxtaposes the de jure multi-ethnic liberal democratic form of governance with the de facto results and consequences of Kosovo's task to protect, accommodate and integrate its ethnic minorities.

MUSLIM BROTHERHOOD (SYRIA)
Title: The Muslim Brotherhood in Syria
Author: Conduit, Dara, 1986-
Published: Cambridge, UK : Cambridge University Press, 2019
Physical Description: xvi, 268 pages ; 23 cm.
Series: Cambridge Middle East Studies ; 56
Notes: Having played a role in every iteration of Syrian politics since the country gained independence in 1946, the Muslim Brotherhood were the most prominent opposition group in Syria on the eve of the 2011 uprising. But when unrest broke out in March 2011, few Brotherhood flags and slogans were to be found within the burgeoning protest movement. Drawing on extensive primary research including interviews with Brotherhood members, the author looks to the group's history to understand why it failed to capitalize on this advantage as the conflict unfolded, addressing significant gaps in accounts of the group's past to assess whether its reputation for violence and dogmatism is justified. In doing so, the author reveals a party that was neither as violent nor as undemocratic as expected, but whose potential to stage a long-awaited comeback was hampered by the shadow of its own history.

NATO
Title: NATO in the 21st Century : A Central European Perspective
Additional Author: Baranyi, Tamas Peter, ed.
Additional Author: Stepper, Peter, ed.
Institution: NATO Public Diplomacy Division
Institution: Ministry of Foreign Affairs and Trade (HU)
Published: Budapest : Antall Jozsef Knowledge Centre, 2019
Physical Description: 293 pages ; 24 cm.
Notes: The year 2019 marks a double anniversary for the North Atlantic Treaty Organization : it has been seventy years since the alliance was founded and twenty years since the first round of the accession of Central and Eastern European countries. NATO's founding in 1949 proved to be a turning point for the political and military history of the entire world, while 1999 was decisive for the CEE region in terms of re-joining the West in a political sense. This duality of approach runs through the whole body of the present volume about NATO and its Central and Eastern European experience. In this book, the editors wanted to compile contemporary issues and perspectives from a predominantly European framework and with a heavy emphasis on Central and Eastern Europe. Even though a quality NATO compendium must involve global issues - global outlook, burden-sharing - the present book decidedly focuses on NATO as a device of European defence. Recent trends in challenges, the emergence of new security threats, and the responses to them push the alliance to a characteristic new path in the future.

NUCLEAR-WEAPON-FREE-ZONES--MIDDLE EAST
Title: A Middle East Free of Weapons of Mass Destruction : A New Approach to Nonproliferation
Author: Musavian, Seyed Hossein
Additional Author: Kiyaei, Emad
Published: Abingdon, UK : Routledge, 2020
Physical Description: 155 pages ; 24 cm.
Series: Routledge Advances in International Relations and Global Politics
Notes: Includes index.
Notes: The establishment of a Middle East zone free of nuclear weapons, a concept more recently broadened to cover all weapons of mass destruction (WMD), has been before the international community for decades. In this book, two experts from the region explore why the matter remains unresolved, and outline a comprehensive yet achievable roadmap to a Middle East free of WMD. Weapons of mass destruction pose an existential threat to global peace and security. But nowhere is it more urgent to stem their spread than in the Middle East, a region fraught with mistrust and instability. Accounting for these geopolitical realities, including the ongoing talks to curb Iran's nuclear program, the authors present a practical and innovative roadmap to a Middle East free of weapons of mass destructions (WMD). They outline a phased approach toward disarmament in the region, prescribing confidence-building measures and verification tools to create trust among the region's governments. Their vision also sees the realization of a WMD-free zone within a broader regional agenda for security and cooperation to advance socioeconomic and political progress.

Dans un monde de concurrence exacerbée entre les grandes puissances, de compétition pour l'accès aux ressources, d'affrontements violents entre les civilisations et les religions, une nouvelle guerre mondiale est-elle vraiment improbable, voire impensable ? Si elle veut survivre, l'humanité est 'condamnée' à la paix. Mais quelle paix ? L'histoire nous éclaire. Depuis l'aube du néolithique, il n'y a eu de paix qu'imperiale. Une telle paix ne saurait se réduire à l'exercice brutal d'une force arbitraire. Elle doit laisser aux populations dominées des zones d'autonomie, les persuader qu'il n'y a pas d'autre ordre possible. Or la Pax americana des années 1945-2003 a été la dernière paix impériale. La mondialisation, dynamique globale et conflictuelle, voue désormais toute ambition impériale planétaire, même celle d'une Chine réveillée, à l'échec. La seule paix mondiale possible doit reprendre le laborieux chemin de la paix contractuelle, démocratique et institutionnelle, explore notamment par le philosophe allemand Emmanuel Kant. Il faudra bien bâtir la paix pour que notre terre ne devienne pas un enfer.
POSTWAR RECONSTRUCTION
Title: Institution Building in Weak States: The Primacy of Local Politics
Author: Radin, Andrew
Published: Washington: Georgetown University Press, 2020
Physical Description: xvi, 257 pages: illustrations; 23 cm.
Notes: Bibliography: p. 239-248. Includes index.
Notes: The effort to improve state institutions in post-conflict societies is a complicated business. Even when foreign intervention is carried out with the best of intentions and the greatest resources, it often fails. What can account for this failure? The author argues here that the international community’s approach to building state institutions needs its own reform. In contrast to the common strategy of foreign interveners - imposing models drawn from Western countries - the author shows how pursuing incremental change that accommodates local political interests is more likely to produce effective, accountable, and law-abiding institutions. Drawing on extensive field research and original interviews, the author examines efforts to reform the central government, military, or police in post-conflict Bosnia and Herzegovina, Kosovo, Iraq, and Timor-Leste. Based on his own experience in defense reform in Ukraine after 2014, the author also draws parallels with efforts to improve state institutions outside of post-conflict societies.

PROTEST MOVEMENTS--CHINA
Title: Hong Kong in Revolt: The Protest Movement and the Future of China
Author: Loong-Yu, Au
Published: London: Pluto Press, 2020
Physical Description: vii, 198 pages: illustrations; 22 cm.
Notes: Includes index.
Notes: Hong Kong is in turmoil, with a new generation of politically active citizens shaking the regime. From the Umbrella Movement in 2014 to the defeat of the Extradition Bill and beyond, the protestors' demands have become increasingly radical, launching the first successful political strike in half a century and facing strong repression by the government and police. This book chronicles the uprising and sets the protest movements within the context of the colonisation, revolution and modernisation of China. Looking deep into the roots of the movement and its internal tensions, the role of 'Western value' vs 'Communism' and 'Hong Kongness' vs 'Chineseness', the author explores cultural and political struggles through a broader geopolitical history. For good or for bad, Hong Kong has become a battlefield of the historic contest between the US, the UK and China.

REFUGEES--LEGAL STATUS, LAWS, ETC.

Title: The Arc of Protection: Reforming the International Refugee Regime
Author: Aleinikoff, Thomas Alexander, 1952-
Additional Author: Zamore, Leah
Published: Stanford, CA: Stanford University Press, 2019
Physical Description: viii, 169 pages ; 21 cm.
Notes: The international refugee regime is fundamentally broken. Designed in the wake of World War II to provide protection and assistance, the system is unable to address the record numbers of persons displaced by conflict and violence today. States have put up fences and adopted policies to deny, deter, and detain asylum seekers. People recognized as refugees are routinely denied rights guaranteed by international law. The results are dismal for the millions of refugees around the world who are left with slender prospects to rebuild their lives or contribute to host communities. The authors lay bare the underlying global crisis of responsibility. The book adopts a revisionist and critical perspective that examines the original premises of the international refugee regime. The authors identify compromises at the founding of the system that attempted to balance humanitarian ideals with sovereign control of their borders by states. This book offers a way out of the current international morass through refocusing on responsibility-sharing, seeing the humanitarian-development divide in a new light, and putting refugee rights front and center.

REPATRIATION

Title: The Ethics and Practice of Refugee Repatriation
Author: Gerver, Mollie
Published: Edinburgh: Edinburgh University Press, 2020
Physical Description: vii, 248 pages ; 23 cm
Notes: Includes index.
Notes: Millions of refugees flee their homes and seek asylum abroad every year. Upon arrival, many are forced into enclosed camps with minimal provisions or are unable to gain residency rights in the host country. Facing these difficulties, they often resort to a high-risk return to their country of origin. The author considers when and whether humanitarian organisations, the United Nations, and government agencies ought to help with repatriation. Drawing on extensive ethnographic fieldwork involving 172 refugees throughout the repatriation process, this study puts a human face on debates about migration. The author organizes the discussion into seven ethical dilemmas that typically arise in repatriation and resolves each by using the tools of analytic philosophy. Readers will therefore gain a deeper understanding of the particular challenges arising from the process of refugee assistance and a comprehensive set of guidelines for applying moral principles in practice.

How can we understand the strategic interaction between secessionist movements and sovereign states? A casual review of the many secessionist struggles around the world, both violent and peaceful, shows a variety of types. Some, like Catalonia, are pursuing their ends using combinations of electoral capture and civil demonstrations, just as the Spanish government is working to delegitimize these efforts and defeat them in the polls. Regions like Nagorno Karabkh (Artsakh) lack the same institutional connectivity with the larger state of Azerbaijan, and are relegated to a de facto (but unrecognized) status where defense, deterrence, and diplomacy are critical. For its part, Azerbaijan invokes its territorial integrity and attempts to deny all forms of recognition to the breakaway region.

Other regions from Wet Papua to Tibet are faced with the hard choice between civil resistance and the use of violence, and their states are keen to suppress their efforts and hide them from the world. What features are common across all of these examples, and how do they differ? This volume synthesizes a number of theories and theoretical approaches that purport to explain the strategies of secession and counter-secession. This is an important topic. Apart from the many legal and cartographical issues that attend secessionist activity, the potential for conflict is a very real concern. Estimates put the share of civil wars driven by secessionism at about 50%, and according to Barbara Walter secessionism is the chief source of violence in the world today. Secessionism is destabilizing because, at the least, it presents a direct challenge to existing political systems. Yet surprisingly, the strategic interaction between states and secessionists is an area in which we have incomplete understanding.
TARGETED KILLING (INTERNATIONAL LAW)

**Title:** Targeted Killings, Law and Counter-Terrorism Effectiveness: Does Fair Play Pay Off?

**Author:** Falk, Ophir, 1968-

**Published:** Abingdon, UK: Routledge, 2021

**Physical Description:** 143 pages : illustrations ; 24 cm.

**Series:** Contemporary Security Studies

**Notes:** Includes index.

**Notes:** This book examines the permissibility and effectiveness of targeted killing in campaigns against terror. Targeted killing has become a primary counterterrorism measure used by several countries in their confrontation with lethal threats. The practice has been extensively used by the US in Afghanistan, Iraq, Pakistan, Yemen and Somalia, and by Israel in the West Bank and Gaza. Several studies have already explored the difficult balance between achieving security while maintaining the liberties and rights of a country’s civilians. This book goes a step further by seeking to examine whether maintaining those liberties by complying with legal standards and minimizing unintended deaths can be more effective for national security. Using targeted killing applied by Israel, in particular, as well as the United States during the first decade of the 21st century as case studies, this book explores that question and ultimately assesses whether compliance with legal standards can strengthen a state in its campaign against terrorism and thus provide stronger security. The book focuses on civilian-related criteria, hypothesizing that minimizing civilian casualties will maximize effectiveness in an asymmetric war setting. The conclusions are not limited to a specific tactic or theater, and if adopted might have far-reaching implications for how asymmetric warfare is strategized.

Title: US Policy Towards Afghanistan, 1979-2014 : 'A Force for Good'
Author: Teitler, Anthony
Published: Abingdon, UK : Routledge, 2020
Physical Description: 227 pages ; 24 cm.
Series: Routledge Studies in US Foreign Policy
Notes: Includes index.
Notes: Providing a study of US policy towards Afghanistan from the Soviet intervention of 1979 to the exit of US/International Security Assistance Forces (ISAF) combat troops at the end of 2014, this book examines how the United States' construction of its interests has shaped its long-term involvement with that country. Recognising that there is a particular focus on the United States' representation and justification of its Afghan policy, this work demonstrates how the intertwining of language and social practices provided policymakers' with a shared meaning on selling policy. In this way, Washington justified its practices - including covert operations, diplomacy, counterterrorism and war - as essential in ensuring that 'good' prevailed over 'evil'. The author's argument contrasts with the existing literature, which predominantly argues the US has been motivated by self-interest in its dealings with Afghanistan. The author deploys a constructivist approach to elucidate upon US-Afghan relations in this critical historical juncture. Through its particular use of constructivism, the work aims to contribute more broadly to international relations and US foreign policy scholarship.

For generations of Americans, the US has been the world's dominant military power. How the US military fights, and the systems and weapons that it fights with, have been uncontested. That old reality, however, is rapidly deteriorating. America's traditional sources of power are eroding amid the emergence of new technologies and the growing military threat posed by rivals such as China. America is at grave risk of losing a future war. The future will be defined by artificial intelligence, autonomous systems, and other emerging technologies that are revolutionizing global industries and are now poised to overturn the model of American defense. This fascinating, if disturbing book, confronts the existential risks on the horizon, charting a way for America's military to adapt and succeed with new thinking as well as new technology. America must build a battle network of systems that enables people to rapidly understand threats, make decisions, and take military actions, the process known as 'the kill chain'. Examining threats from China, Russia, and elsewhere, this book offers hope and, ultimately, insights on how America can apply advanced technologies to prevent war, deter aggression, and maintain peace.

WOMEN AND THE SECURITY SECTOR
Title: The Gender and Security Agenda: Strategies for the 21st Century
Additional Author: Jonge Oudraat, Chantal de, ed.
Additional Author: Brown, Michael Edward, 1954-, ed.
Published: Abingdon, UK: Routledge, 2020
Physical Description: xvi., 274 pages: illustrations; 24 cm.
Series: Routledge Studies in Gender and Security
Notes: Includes index.
Notes: This book examines the gender dimensions of a wide array of national and international security challenges. The volume examines gender dynamics in ten issue areas in both the traditional and human security sub-fields: armed conflict; post-conflict; terrorism; military organizations; movement of people; development; environment; humanitarian emergencies; human rights; governance. The contributions show how gender affects security, and how security problems affect gender issues. Each chapter also examines a common set of key factors across the issue areas: obstacles to progress; drivers of progress; and long-term strategies for progress in the 21st century. The volume develops key scholarship on the gender dimensions of security challenges and thereby provides a foundation for improved strategies and policy directions going forward. The lesson to be drawn from this study is clear: if scholars, policymakers and citizens care about these issues, then they need to think about both security and gender.

WORLD POLITICS
Title: Le temps des prédateurs: la Chine, les États-Unis, la Russie et nous
Author: Heisbourg, François
Published: Paris: Odile Jacob, 2020
Physical Description: 237 pages; 22 cm.
Notes: Comment la France et l'Europe, menacées par le déclin économique et démographique sur toile de fond de crise politique et morale, peuvent-elles se défendre face à ces nouveaux prédateurs que sont la Chine - désormais superpuissance consciente de son rang historique -, la Russie - insatisfaite de l'ordre postsoviétique sur notre continent - ou les États-Unis ? Pour tenter de répondre à cette question, il faut d'abord reconnaître les terrains de chasse de la préation moderne. C'est à partir de là que nous pourrons apprécier les logiques de comportement des fauves avant d'analyser les options stratégiques qui s'offrent à nous, Européens, si nous ne voulons pas être leur proie. L'auteur analyse les différentes formes de préation - commerciale, industrielle, financière, bien sûr, mais aussi idéologique et politique -, souligne les retournements de l'Histoire - comment les pays européens sont passés de prédateurs à proies - et appelle nos pays à rassembler leurs forces pour résister à la préation.

Title: China’s Grand Strategy under Xi Jinping: Reassurance, Reform, and Resistance
Author: Goldstein, Avery
Published: 2020
Notes: China’s grand strategy under Xi Jinping is clearly distinctive. It does not, however, fundamentally break with the grand strategy that China has embraced since the early 1990s—one that aims to realize what is now labeled ‘the dream of national rejuvenation’. Leaders in Beijing have implemented three different approaches to this strategy. In 1992, the approach to rejuvenation followed Deng Xiaoping’s admonition for China to hide its capabilities and bide its time. In 1996, Beijing shifted to a more proactive approach, peaceful rise, seeking to reassure others that a stronger and wealthier China would not pose a threat. In 2012, Xi again recast the grand strategy of rejuvenation to realize the Chinese dream. His approach is distinguished by its combination of three efforts: (1) continuing earlier attempts to reassure others about the benign intentions of rising China, (2) moving China from rhetoric to action in promoting reform of an international order that has facilitated China’s rise, and (3) resisting challenges to what the Chinese Communist Party defines as the country’s core interests. Xi’s bolder approach has further clarified China’s long-standing international aspirations and triggered reactions abroad that raise doubts about the prospects for his approach to realizing the goal of national rejuvenation.

Le système international d'après : liberté et réalisme ?

Notes:
La crise sanitaire mondiale a jete une lumière crue sur des relations internationales en grand désordre et sur une inquiétante montée des dangers. Au moment où le vaste mouvement de la mondialisation et les interdépendances qu'il crée exigent des règles et une gouvernance mondiale pour dialoguer et coopérer c'est le contraire qui semble se produire. Nous redécouvrons que le monde est un terrain de jeu dangereux. Sommes-nous pour autant condamnés à subir cette dérive inéluctable comme beaucoup nous le prédisent ? Est-il encore temps d'en reprendre les fils pour conserver notre liberté et celle des Européens, si malmenée ?

EU--ANTARCTICA
Title: The EU in Antarctica: An Emerging Area of Interest, or Playing to the (Environmental) Gallery?
Author: Raspotnik, Andreas
Additional Author: Osthagen, Andreas
Published: 2020
Notes: Over the past decade, the EU has developed broader interests in the polar region-ranging from fisheries, research and environmental protection to foreign affairs. Although this applies mainly to the Arctic region, its geographical opposite—the Antarctic—has not fallen into oblivion. This article explores the EU's way 'south', examining its links to the region as well as the key drivers of this growing—albeit still limited—Antarctic engagement. International actions taken to establish Marine Protection Areas (MPAs) also indicate supranational tendencies to engage actively in and with Antarctic affairs. In particular, this concerns the European Commission and broader debates on sustainable development and global environmental leadership.

EU--CHINA
Title: EU-China Security Relations: Discourse vs Practice and the Role of EU Member States
Author: Montesano, Francesco Saverio
Published: 2019
In: INTERNATIONAL SPECTATOR, vol. 54, no. 2, June 2020, p. 139-158.
Notes: The gap between discourse and practice which has so far prevented the EU and China from implementing the ambitious security agenda developed within the framework of their strategic partnership is caused by two main sets of impeding factors: practical, stemming from existing policies, and normative, deriving from fundamental divergences regarding the nature of an actor's role in the international arena. Moreover, obstacles to EU-China security cooperation also stem from and are magnified at the EU member states level. Key member states lack normative and practical synergy in their understanding of security policy and the role the EU and China play in it, thus severely complicating any attempt at bridging the discourse/practice gap.

EU--EMIGRATION AND IMMIGRATION
Title: The EU-Turkey Migration Deal: Performance and Prospects
Author: Dagi, Dogachan
Published: 2020
Notes: This article discusses whether the EU-Turkey migration deal of 2016 is sustainable in the midst of divergent priorities and expectations of the parties, adverse results procured from the deal, and growing mutual distrust between the EU and Turkey. In doing so, first, it provides an overview on the background of Europe's migration crisis of 2015-2016 and outlines the rationale behind and expectations from the deal. Secondly, the article critically reviews the performance of the deal to evaluate the extent to which it has met the expectations. It is explained that while Turkey has gained strategic leverage in its relations with the EU its government has to bear political costs at the home-front and shelve off its accession perspective. The EU, on the other hand, has managed to reduce the number of migrants using the Eastern Mediterranean route but has to endure constant threats of the Turkish government to withdraw from the deal and put up with its withering reputation as a normative power. Finally, by highlighting the expectation-outcome gap and the political cost the deal has induced to bear for both parties, this article demonstrates that the agreement has been circumstantial without a solid foundation, and any of the parties may opt-out once it regards the cost-benefit balance works unfavourably for them.

EU–NATIONAL SECURITY
Title: EU Security and Defence Cooperation in Times of Dissent: Analysing PESCO, the European Defence Fund and the European Intervention Initiative (E12) in the Shadow of Brexit
Author: Sweeney, Simon
Additional Author: Winn, Neil
Published: 2020
Notes: Has the United Kingdom (UK) Brexit referendum been a catalyst for more European Union security cooperation? How significant are post-referendum initiatives in security and defence? What are the implications of Brexit for European Union (EU) and UK security and defence? This article analyses EU post-Brexit strategic choices following the launch of the EU Global Strategy (2016). EU autonomy in security and defence requires close cooperation with third countries, including Norway and post-Brexit UK. It remains to be seen whether the EU and the UK can forge a new bespoke security and defence relationship that delivers mutual benefits through shared strategic ambitions, while also protecting their various interests. The authors suggest there will be serious collateral damage to UK-EU security and defence cooperation if post-Brexit trade negotiations descend into acrimony and mistrust, especially in the event of 'no-deal' once the 'transition period' ends. This would undermine European security and the EU's quest for strategic autonomy in world affairs and have serious implications for both UK and EU security. The authors conclude that the EU needs to work with the UK on a plan to achieve global strategic autonomy, or both risk reduced influence in the wider world in the years ahead.

EUROPEAN NEIGHBOURHOOD POLICY (PROGRAM)

Title: The European Union’s Credibility-Expectations Gap in Its European Neighbourhood Policy: Perspectives from Georgia and Ukraine
Author: Dekanozishvili, Mariam
Published: 2020
Notes: Fifteen years have passed since the European Union launched the European Neighbourhood Policy (ENP). Despite the EU’s attempts to reload the ENP, first in 2011 and later in 2015, in response to challenges in the neighbourhood, the ENP continues to suffer from a credibility-expectations gap. This article argues that understanding neighbour perceptions of the ENP offers useful insights about the ENP. Supported by twenty-five interviews with Georgian and Ukrainian public officials, the article unveils the EU’s credibility challenge in the Eastern neighbourhood caused by a gap between the EU’s own perception of its role and the role expectations held by the ENP partners, as well as a gap between partners’ expectations and the EU’s performance on the ground. The lack of coherence, legitimacy and consistency has undermined the credibility of the ENP in the eyes of its Eastern partners. The latest review of the ENP does not seem to address the credibility challenge.

GREECE--FOREIGN RELATIONS--TURKEY
Title: The View from Next Door : Greek-Turkish Relations after the Coup Attempt in Turkey  
Author: Christofis, Nikos  
Additional Author: Baser, Bahar  
Additional Author: Ozturk, Ahmet Erdi  
Published: 2019  
Notes: Turkey’s recent slide into authoritarianism will have implications for its close neighbours in the West. Especially Greece cannot avoid negative spill-over effects. A coalition government comprising Syriza and Independent Greeks does not have an unconstrained set of policy choices in responding to this. Maintaining effective working relations is a paramount interest but achieving this is easier in principle than in practice especially considering the issues of asylum seekers and Turkish revisionism on the Lausanne Treaty. Unlike the two parties that dominated the Greek political scene after 1974, PASOK and New Democracy, the current government has little experience navigating choppy diplomatic seas with Turkey.

GREENLAND--FOREIGN RELATIONS
Title: Greenland's Arctic Advantage : Articulations, Acts and Appearances of Sovereignty Games  
Author: Jacobsen, Marc  
Published: 2020  
Notes: Greenland representatives successfully use the renewed international geostrategic interest in the Arctic to enhance Greenland’s foreign policy sovereignty. This is facilitated by Denmark’s dependence on Greenland’s geographic location and continuous membership of the Danish Realm for maintaining the status of an Arctic state, which recently has become one of the five most important security and foreign policy priorities. The dependency gives Greenland an ‘Arctic advantage’ in negotiations with Denmark, while turning circumpolar events into strategic arenas for sovereignty games in the aim to move the boundary of what Greenland may do internationally without Danish involvement. This article analyzes how these games unfold in the Arctic Council, at the high-level Ilulissat meetings and at circumpolar conferences where Greenland representatives articulate, act and appear more foreign policy sovereignty through outspoken discontent, tacit gestures and symbolic alterations. Altogether, this contributes to the expanding of Greenland’s foreign policy room for maneuver within the current legal frameworks, while enhancing Greenland’s international status and attracting external investments, important in their striving towards becoming a state with full formal Westphalian sovereignty.

Hong Kong (China)--Politics and Government
Title: Hong Kong’s Summer of Discontent: Another Battle in the Long War over Autonomy, Democracy, and the Rule of Law
Author: delisle, Jacques
Published: 2019
In: ORBIS, vol. 63, no. 4, Fall 2019, p. 473-504.
Notes: Proposed legislation that would permit extraditions to Mainland China sparked sharp opposition and street protests that led to perhaps the most serious political crisis in Hong Kong since the territory returned to Chinese rule in 1997, including large-scale police violence, increasingly radical tactics by some protesters, and growing concerns that China would forcibly intervene. The clash over the extradition bill echoed many earlier conflicts over intertwined legal and political issues. These controversies were part of a long-running struggle over autonomy, democracy, and the rule of law for Hong Kong. They reflected and partly arose from two opposing camps’ fundamentally conflicting conceptions of domestic law and governance for Hong Kong that date to the pre-reversion period and that have persisted and evolved in Hong Kong under Chinese rule. Like earlier controversies, the conflict over the extradition bill also reflects two sides’ incompatible conceptions of international law and sovereignty that trace back to the 1980s and 1990s. Although there is, thus, much continuity in the legal-political confrontations that have roiled Hong Kong, changing political and social contexts may be making the conflicts more severe and intractable.

Information Warfare--Russia (Federation)
Title: Old Wine in a New Bottle: Russia’s Modernization of Traditional Soviet Information Warfare and Active Policies Against Ukraine and Ukrainians
Author: Kuzio, Taras
Published: 2019
Notes: Information warfare was not invented by Vladimir Putin, but draws on Soviet information and disinformation campaigns. This article adds to the scholarly literature by showing the links between Tsarist, Soviet, and Russian narratives in Moscow’s contemporary information warfare. Messages in Russia’s information warfare are not only traditionally Soviet; they are also Tsarist when referring to Ukrainians. A second addition to the literature analyzes why Russia’s ‘Chekist’ counterintelligence state places Ukraine and Ukrainians at the forefront of Moscow’s information warfare.

NATO--ARMED FORCES--DEFENSE SPENDING
Title: To Free or Not to Free (Ride) : A Comparative Analysis of the NATO Burden-Sharing in the Czech Republic and Lithuania
Author: Pavlickova, Kristyna
Additional Author: Bartoszewicz, Monika Gabriela
Published: 2020
In: DEFENSE & SECURITY ANALYSIS, vol. 36, no. 3, September 2020, p. 335-351.
Notes: The recent rise in the defence budgets among the NATO members reawakens the free-riding dilemma. This article provides an analysis of the defence spending of two new member states, the Czech Republic and Lithuania. Based on the free-riding theory, the authors explain why some of the new NATO members decide to increase their defence budgets (Lithuania), and others do not (Czech Republic). In contrast to the majority of works which focus either on the US as the biggest spender or on the 'old' members of the Alliance, the authors explain under what circumstances some of the small European states who became new NATO members started to increase their defence budgets even though they do not have to, and the literature suggests that free-riding is easier. In the process, the authors identify three crucial factors that influence the decision-making process in this regard : the level of threat perception, economic situation, and the US pressure.

The article deals with an empirical investigation of the determinants of military expenditure of selected NATO countries. Economic, security, and political determinants were analysed by means of panel models. In order to analyse the economic environment as a determinant of military expenditure, the following variables were applied: Risk of Budget Balance, Risk of Foreign Debt, Risk of Inflation, Risk of GDP per Capita, Risk of GDP Growth, and a control variable, Risk of Current Account as a percentage of GDP. The following variables were employed for the security risk analysis: Terrorism, Cross Border Conflict, Ethnic Tension, and Foreign Pressures. A variable evaluating the Democratic Accountability and a control variable Government Stability were selected to analyse political risks. The results show serious inconsistencies in factors affecting the military expenditures of traditional and new NATO member countries.

Despite sometimes promiscuous claims by President Trump's critics, controversy about America's commitment under Article 5 dates back seven decades. If largely quiescent through the Soviet Union's collapse, it was because the core Article 5 commitment thankfully went untested. Controversy reemerged with NATO enlargement eastward. In a strange inversion, what c.1949 was a prime objection to its commitment to use force—what Senator Forrest Donnell called the illusory discretion of the "such action as it deems necessary" condition added by George Kennan and other proponents to rescue the Washington Treaty in the Senate—is now embraced, ahistorically, by Article 5 hawks: that the commitment is mechanical, not discretionary. It is substantially a unilateral American one, too. Chronic European underspending and anemic public support across the continent challenge whether most NATO countries could—or would—rally to an ally's defense.

Under what conditions are cyber-weapon effective in nuclear counter-proliferation? With continued interest in nuclear proliferation professed by Iran, North Korea, and Saudi Arabia, a discussion of the effectiveness of counter-proliferation measures remains relevant. Cyber-attacks as military option in a state-on-state conflict still requires additional corroborating evidence to make conclusions about its long-term effectiveness. This work analyses the general applicability of cyber-weapons and their usefulness in nuclear counter-proliferation. Through a comparative case study of Operation Orchard, Stuxnet, and recent 'Left-of-Launch' operations against North Korea, the essay finds that cyber-operations are not particularly effective against nuclear programmes that are in the later stages of their development. They can disrupt and delay a nuclear programme temporarily, if the attack remains clandestine, but cannot halt nuclear proliferation all together. However, effectiveness increases if they are used in combination with conventional weapons. The article addresses a topic of interest to national-level decision-makers: whether cyber-operations can and should play a role in nuclear counter-proliferation.

Title: A Typology of Populism: Understanding the Different Forms of Populism and their Implications
Author: Peters, B. Guy
Additional Author: Pierre, Jon
Published: 2020
In: DEMOCRATIZATION, vol. 27, no. 6, September 2020, p. 928-946.
Notes: Populism has become one of the most commonly used concepts in contemporary political science, albeit one which is often contested. Most of the discussion of populism, however, has focused on elections and political party systems. The authors argue that populist politics can be seen in a number of other dimensions of governance. They develop a typology of populist practices that appear in both democratic and non-democratic political systems, and discuss their relationships to governance. This article helps to clarify the nature of contemporary populism and its place in politics.

RUSSIA (FEDERATION)--FOREIGN RELATIONS--CHINA
Title: The Un-Holy Russo-Chinese Alliance
Author: Blank, Stephen
Published: 2020
Notes: This essay argues that a Sino-Russian alliance has come into being over many years of the two states' evolutionary policies. Although Vladimir Putin has emphasised that this is a multi-faceted relationship, this essay focuses exclusively on its military dimension. It comprises extensive inter-ministerial and inter-governmental cooperation, arms sales, joint exercises, and shared political orientation. While it may not be a formal alliance like NATO research, e.g. by Alexander Korolev, indicates that in general experts argue that what they have achieved is even better than an alliance.

TALIBAN
Title: Rebel Governance, Rebel Legitimacy, and External Intervention : Assessing Three Phases of Taliban Rule in Afghanistan
Author: Terpstra, Niels
Published: 2020
In: SMALL WARS AND INSURGENCIES, vol. 31, no. 6, September 2020, p. 1143-1173.
Notes: This article focuses on rebel governance and rebel legitimacy during civil war. It investigates how external intervention in support of an incumbent government and withdrawal of external forces shape rebel legitimacy dynamics and rebels’ opportunities to govern. It adopts a longitudinal perspective on Afghanistan’s Taliban, analyzing three phases of the movement’s existence. Moral forms of legitimacy resonated particularly during instances of external intervention, whereas pragmatic forms of legitimacy became more relevant after the withdrawal of external forces and during periods of the Taliban’s opponents’ ineffective governance. The article is based on a literature review and fieldwork in Afghanistan.

TERRORISM--PREVENTION
Title: Military Counterterrorism Measures, Civil-Military Relations, and Democracy : The Cases of Turkey and the United States
Author: Satana, Nil S.
Additional Author: Demirel-Pegg, Tijen
Published: 2020
In: STUDIES IN CONFLICT AND TERRORISM, vol. 43, no. 9, September 2020, p. 815-836.
Notes: This study examines how military counterterrorism (CT) measures affect the quality of democracy by altering civil–military relations (CMR) and focuses on CMR as the main causal mechanism. The authors argue that the use of military measures in CT jeopardizes democracy at the societal level by increasing the belief that only the military is equipped to deal with the threat at hand. Therefore, erosions of civil liberties are tolerated in exchange for security. Second, the authors argue that military CT measures change the balance between the military and civilian executive powers in procedural and liberal democracies. While the military’s executive power increases in procedural democracies, civilian executive power increases and goes unchecked in liberal ones. Case studies of the United States and Turkey show that military CT measures affect CMR in these countries, which generate a similar tradeoff between security and the quality of democracy, albeit via different causal mechanisms. While that tradeoff is less severe in the United States, Turkey is more vulnerable to erosion of democracy.

TURKEY--POLITICS AND GOVERNMENT
Title: Erdogan's Presidential Regime and Strategic Legalism : Turkish Democracy in the Twilight Zone
Author: Yilmaz, Zafer
Published: 2020
Notes: President Erdogan and the AKP government initiated a comprehensive restoration process immediately after the failed coup in mid-July 2016. In fact, the country has been experiencing a very comprehensive and violent regime transformation since this time. The author asserts that recent political developments paved the way for institutionalization of a ‘plebiscitary presidential regime’ that depends on a particular combination of supreme power of the leader, an extremely weak parliament, and elections of a plebiscitary character. In this context, the paper aims to shed light on the role of the new strategic legalism which allows rule of law to be replaced by a rule by law approach, the executive prerogative principle to be dominant, and the law to be used for demobilization, all playing a highly critical role in the suppression of democratic opposition.

URBAN WARFARE
Title: La ville, champ de bataille d'hier a demain
Author: Santoni, Pierre
Published: 2020
Notes: Historiquement, les guerres se sont davantage deroulees autour des villes que dans les villes. La zone urbaine est devenue un champ de bataille moderne a partir des années 1930. Elle agit comme un egalisateur de forces entre les armées les plus avancees et les groupes non-étatiques moins bien équipés, comme l'a encore montre recemment la bataille de Mossoul. L'emploi de robots militaires est amene a se developer et leurs impacts sur les conflits sont difficiles a anticiper.

The US-Japan Alliance Dilemma in the Asia-Pacific: Changing Rationales and Scope

Author: Atanassova-Cornelis, Elena
Additional Author: Sato, Yoichiro
Published: 2019

Notes: The changes in the US-Japan alliance are taking place in times of a global power shift – a transition from unipolarity to multipolarity – and China’s challenge to the US’ security dominance in the Asia-Pacific. The alliance security dilemma now manifests itself in the rise of ‘entrapment’ concerns for Washington and ‘abandonment’ anxieties for Tokyo. The US increasingly insists on more mutuality in alliance arrangements, while seeking to maintain ambiguity in its defence commitments to Japan. The relative decline of US power and the fluid regional security architecture, however, incentivise Japan to step up preparations for abandonment. Although Tokyo’s hedging strategy contributes to enhancement of the bilateral alliance in the short term, it also paves the way for Japan’s pursuit of strategic autonomy in the medium to long term.

The Utility of Narrative Matrix Games: A Baltic Example

Author: Curry, John
Published: 2020
In: NAVAL WAR COLLEGE REVIEW, vol. 73, no. 2, Spring 2020, p. 33-52.

Notes: The focus of professional gaming has shifted over time from the kinetic so as to include wider aspects of confrontations beyond war fighting, such as national will, social media, economics, and the laws of war. While traditional wargame models have struggled to represent these factors adequately, the matrix game narrative method offers utility for gaming current political crises.

Cheater's Dilemma: Iraq, Weapons of Mass Destruction, and the Path to War

Author: Braut-Hegghammer, Malfrid
Published: 2020

Notes: Between the 1991 Gulf War and the U.S.-led invasion in 2003, the Iraqi regime faced a cheater’s dilemma: how much should it reveal of Iraq’s weapons of mass destruction (WMD) capabilities when each additional revelation made it less likely that the country would be rewarded, while continued denial also prevented the lifting of sanctions. The Iraqi leadership struggled to resolve this dilemma, as elites pursued competing policies and subordinates did not consistently obey Saddam Hussein’s orders. These difficulties reflected principal-agent problems that were aggravated by the leadership’s initial attempts to deny and cover up Iraq’s WMD capabilities. Together, the cheater’s dilemma and principal-agent problems explain a range of puzzling Iraqi behaviors that came across as calculated ambiguity to the outside world. These findings offer insights into the incentives and constraints that shape how other authoritarian regimes respond to external pressures to eliminate their WMD, and the extent to which they are willing and able to disclose information about past programs and their past efforts to conceal this information from the outside world.

**ARTIFICIAL INTELLIGENCE--LAW AND LEGISLATION**

*Title:* Robot Rules: Regulating Artificial Intelligence [electronic resource]

*Author:* Turner, Jacob

*Published:* Cham, Switzerland: Palgrave MacMillan, 2019

*Physical Description:* 1 online resource (xx, 377 pages)

*Notes:* Includes index.

*Notes:* This book explains why AI is unique, what legal and ethical problems it could cause, and how we can address them. It argues that AI is unlike any other previous technology, owing to its ability to take decisions independently and unpredictably. This gives rise to three issues: responsibility - who is liable if AI causes harm; rights - the disputed moral and pragmatic grounds for granting AI legal personality; and the ethics surrounding the decision-making of AI. The book suggests that in order to address these questions we need to develop new institutions and regulations on a cross-industry and international level.

**BALLISTIC MISSILE DEFENSES--USA**

*Title:* Narrowing the U.S.-China Gap on Missile Defense: How to Help Forestall a Nuclear Arms Race [electronic resource]

*Author:* Zhao, Tong

*Institution:* Carnegie Endowment for International Peace (US)

*Published:* Washington: Carnegie Endowment for International Peace, 2020

*Physical Description:* 1 online resource (83 pages)

*Notes:* The ongoing dispute over the impact of U.S. missile defense on China presents a major and growing challenge to the U.S.-China security relationship. If Beijing's concerns are left unaddressed, they will likely fuel more intensive Chinese efforts to modernize its nuclear forces and other strategic capabilities. Amid rising great power competition, this dispute and its consequences could severely undermine bilateral strategic stability. Finger pointing has done no good, as the perception gap between the two countries over the motivations behind U.S. missile defense is genuine and deeply rooted. What have not been as thoroughly examined are the sources of the perception gap and practical ways to bridge it. Significant ambiguities on both sides over their respective technical capabilities and policy deliberations are a main cause of this perception gap. This report identifies three main sets of ambiguities and analyzes how and why they have arisen, so as to provide actionable recommendations on both cooperative and unilateral ways the two countries can tackle them.

COMBINED OPERATIONS (MILITARY SCIENCE)--POLITICAL ASPECTS
Title: Constructing Allied Cooperation: Diplomacy, Payments, and Power in Multilateral Military Coalitions [electronic resource]
Author: Henke, Marina E., 1982-
Published: Ithaca, NY : Cornell University Press, 2019
Physical Description: 1 online resource (xiii, 242 pages)
Notes: Bibliography. Includes index
Notes: How do states overcome problems of collective action in the face of human atrocities, terrorism and the threat of weapons of mass destruction? How does international burden-sharing in this context look like: between the rich and the poor; the big and the small? These are the questions the author addresses in this book. She demonstrates that coalitions do not emerge naturally. Rather, pivotal states deliberately build them. They develop operational plans and bargain suitable third parties into the coalition, purposefully using their bilateral and multilateral diplomatic connections as a resource. As this book shows, these ties constitute an invaluable state capability to engage others in collective action: they are tools to construct cooperation.

CYBERSPACE--SECURITY MEASURES--ARCTIC REGIONS
Title: Cybersecurity and Resilience in the Arctic [electronic resource]
Additional Author: Trump, B. D., ed.
Additional Author: Hossain, K., ed.
Additional Author: Linkov, I., ed.
Published: Amsterdam : IOS Press, 2020
Physical Description: 1 online resource (456 pages)
Series: NATO Science for Peace and Security Series - D: Information and Communication Security ; 58
Notes: Includes index.
Notes: Until recently, the Arctic was almost impossible for anyone other than indigenous peoples and explorers to traverse. Pervasive Arctic sea ice and harsh climatological conditions meant that the region was deemed incapable of supporting industrial activity or a Western lifestyle. In the last decade, however, that longstanding reality has been dramatically and permanently altered. Receding sea ice, coupled with growing geopolitical disputes over Arctic resources, territory, and transportation channels, has stimulated efforts to exploit newly-open waterways, to identify and extract desirable resources, and to leverage industrial, commercial, and transportation opportunities emerging throughout the region. This book presents papers from the NATO Advanced Research Workshop (ARW) Governance for Cyber Security and Resilience in the Arctic. Held in Rovaniemi, Finland, from 27-30 January 2019, the workshop brought together top scholars in cybersecurity risk assessment, governance, and resilience to discuss potential analytical and governing strategies and offer perspectives on how to improve critical Arctic infrastructure against various human and natural threats. The book is organized in three sections according to topical group and plenary discussions at the meeting on: cybersecurity infrastructure and threats, analytical strategies for infrastructure threat absorption and resilience, and legal frameworks and governance options to promote cyber resilience. The book provides a background on analytical tools relevant to risk and resilience analytics, including risk assessment, decision analysis, supply chain management and resilience analytics. It will allow government, native and civil society groups,
military stakeholders, and civilian practitioners to understand better on how to enhance the Arctic's resilience against various natural and anthropogenic challenges.

**DETERRENCE (STRATEGY)**  
**Title:** Deterring Russia in Europe : Defence Strategies for Neighbouring States [electronic resource]  
**Additional Author:** Vanaga, Nora, ed.  
**Additional Author:** Rostoks, Toms, ed.  
**Published:** Abingdon, UK : Routledge, 2019  
**Physical Description:** 1 online resource (288 pages)  
**Series:** Contemporary Security Studies  
**Notes:** Deterrence, after being largely absent from debates among academics and policy-makers for almost a quarter of a century, has made a comeback in Europe. Since Russia's annexation of Crimea and the start of the military conflict in Ukraine's Donbass region, eastern and northern European states have revised their assessments of Russia's policies and intentions. The approach used by Russia in Ukraine has rendered lessons learned from the Cold War deterrence only partially applicable due to the changing security situation in Europe. The emergence of the cyber realm, a smaller emphasis on nuclear deterrence, and the ideological conflict between Russia and the West, are among the key differences between the Cold War and the current security environment. Structured into two parts, the first part discusses conceptual aspects of deterrence, while the second discusses ten country case studies, which include both NATO and non-NATO countries. This allows for an in-depth analysis of the changing character of deterrence and its practical application by Russia's European neighbours.

**EU--AFRICA, SUB-SAHARAN**  
**Title:** African Strategies : European and Global Approaches towards Sub-Saharan Africa [electronic resource]  
**Author:** Faleg, Giovanni  
**Additional Author:** Palleschi, Carlo  
**Institution:** European Union Institute for Security Studies (FR)  
**Published:** Paris : European Union Institute for Security Studies, 2020  
**Physical Description:** 1 online resource (89 pages)  
**Series:** Chaillot Papers ; 158  
**Notes:** This paper analyses the evolution of EU member states' strategies towards sub-Saharan Africa, as well as those of global actors, against the backdrop of systemic changes, including the implications of the Covid-19 pandemic. It seeks to identify the points of convergence - and divergence - in member states' strategies, and examines how a coherent, joint EU strategy can be achieved. It also shows that there is significant variation in global powers’ strategies towards sub-Saharan Africa, and only limited synergies with European ones. As the EU elaborates a new approach towards and relationship with the continent, in line with its 'strategic pivot' to Africa, it is likely to face adverse competition on a number of economic and geopolitical fronts. But it can also embrace opportunities for enriched international cooperation, reinforcing multilateralism and shaping a more sustainable future.

EU—NATIONAL SECURITY
Title: Security and Defence in Europe [electronic resource]
Additional Author: Ramirez, J. Martin, ed.
Additional Author: Biziewski, Jerzy, ed.
Published: Cham, Switzerland : Springer International Publishing, 2020
Physical Description: 1 online resource (xxvi, 264 pages)
Series: Advanced Sciences and Technologies for Security Applications
Notes: This book argues that security and defense have never been true priorities in the European Union, and have constantly been marginalized by the elites since the Soviet Union collapsed and the Warsaw Pact disintegrated. Despite the official rhetoric, only a few tangible results can be presented concerning the operational readiness of European forces, and the EU's inability to act was proven during the crises in the Balkans. NATO has experienced similar problems, as the majority of its members are EU countries. Both organizations have declared their resolve concerning the security and defense of their nations and territories, but, unfortunately, little has been done to lend these statements credence. In this context, the book analyzes several aspects of EU security and defense, including: the EU-NATO relationship, common defense policy and strategy, common capability building, common understanding of strategic changes, common operational planning and centrally synchronized exercises based on operational planning, etc. The member states have helped to make EU/NATO effective organizations, but unfortunately their individual interests and priorities constitute real challenges. This aspect should be discussed and addressed by political and military elites, scholars, analysts, students and the general public alike.

**HUMAN TRAFFICKING**

**Title:** Human Trafficking in Conflict: Context, Causes and the Military [electronic resource]

**Additional Author:** Muraszkiwicz, Julia Maria, ed.

**Additional Author:** Fenton, Toby, ed.

**Additional Author:** Watson, Hayley, ed.

**Published:** Cham, Switzerland : Palgrave MacMillan, 2020

**Physical Description:** 1 online resource (345 pages)

**Series:** Crime Prevention and Security Management

**Notes:** Includes index.

**Notes:** This book examines the different forms of human trafficking that manifest in conflict and post-conflict settings and considers how the military may help to address or even facilitate it. It explores how conflict can facilitate human trafficking, how it can manifest through a variety of case studies, followed by a discussion of the reasons why the military should include a stronger consideration of human trafficking within their strategic planning given the multiple scenarios in which military forces come into contact with victims of human trafficking, and how this ought to be done. The book draws on the expertise of scholars and practitioners to develop the existing conversations and to offer multiple perspectives. It includes a discussion of existing frameworks and perspectives including legal and policy, and whether they are configured to address human trafficking in conflict.

**LIBYA--POLITICS AND GOVERNMENT**

**Title:** Rise and Fall? The Rise and Fall of ISIS in Libya [electronic resource]

**Author:** Ibrahim, Azeem

**Institution:** US Army War College. Strategic Studies Institute (US)

**Published:** Carlisle Barracks, PA : US Army War College, 2020

**Physical Description:** 1 online resource (79 pages)

**Notes:** This monograph places events in Libya since 2011 into their historical and social context and argues a form of radical Islamism, linked to long-standing national defiance of outside control, remains a factor even after the defeat of the Islamic State of Iraq and Syria (ISIS). This entrenched radicalism means extremist Islamist groups may still make a renewed bid for power until the current civil war is resolved. At the time of this writing, the military campaign by the Libyan National Army has stalled outside Tripoli. Now is the time for the United States and the wider international community to step up and help Libya transition to a unitary government with conventional elections. If this fails to happen and ISIS is able to exploit the current chaos, the hard-won victory over the group in Libya may yet turn out to have been illusory.

MEDIATION, INTERNATIONAL
Title: The European Union as International Mediator: Brokering Stability and Peace in the Neighbourhood [electronic resource]
Author: Bergmann, Julian
Published: Cham, Switzerland : Palgrave MacMillan, 2020
Physical Description: 1 online resource (270 pages)
Series: Palgrave Studies in European Union Politics
Notes: Includes index.
Notes: This book explores the EU's effectiveness as an international mediator and provides a comparative analysis of EU mediation through three case studies: the conflict over Montenegro's independence, the Belgrade-Pristina dialogue between Kosovo and Serbia, and the Geneva International Discussions on South Ossetia and Abkhazia. The book starts from the observation that the EU has emerged as an important international provider of mediation in various conflicts around the world. Against this background, the author develops an analytical framework to investigate EU mediation effectiveness that is then applied to the three cases. The main finding of the book is that EU mediation has a stabilizing effect on conflict dynamics, making renewed escalation less likely and contributing to the settlement of conflict issues. At the same time, the EU's effectiveness depends primarily on its ability to influence the conflict parties' willingness to compromise through conditionality and diplomatic pressure.

NATO--USA
Title: The US Role in NATO's Survival After the Cold War [electronic resource]
Author: Garey, Julie
Published: Cham, Switzerland : Palgrave MacMillan, 2020
Physical Description: 1 online resource (xi, 259 pages)
Series: Palgrave Studies in International Relations
Notes: Bibliography. Includes index.
Notes: This book takes a new approach to answering the question of how NATO survived after the Cold War by examining its complex relationship with the United States. A closer look at major NATO engagements in the post-Cold War era, including in the Balkans, Afghanistan, Iraq, and Libya, reveals how the US helped comprehensively reshape the alliance. In every conflict, there was tension between the United States and its allies over mission leadership, political support, legal precedents, military capabilities, and financial contributions. The author explores why allied actions resulted in both praise and criticism of NATO's contributions from American policymakers, and why despite all of this and the growing concern over the alliance's perceived shortcomings the United States continued to support the alliance. In addition to demonstrating the American influence on the alliance, this works demonstrates why NATO's survival is beneficial to US interests.

POWER (SOCIAL SCIENCES)
Title: The Use of Force for State Power: History and Future [electronic resource]
Author: Warner, Michael
Additional Author: Childress, John
Published: Cham, Switzerland: Palgrave MacMillan, 2020
Physical Description: 1 online resource (315 pages)
Notes: Bibliography. Includes index.
Notes: This book studies force, the coercive application of power against resistance, building from Thomas Hobbes' observation that all self-contained political orders have some ultimate authority that uses force to both dispense justice and to defend the polity against its enemies. This cross-disciplinary analysis finds that rulers concentrate force through cooperation, conveyance, and comprehension, applying common principles across history. Those ways aim to keep foes from concerting their actions, or by eliminating the trust that should bind them. In short, they make enemies afraid to cooperate, and now they are doing so in cyberspace as well.

SOCIAL MEDIA--POLITICAL ASPECTS
Title: Social Media and Democracy: The State of the Field, Prospects for Reform [electronic resource]
Additional Author: Persily, Nathaniel, ed.
Additional Author: Tucker, Joshua Aaron, 1971-, ed.
Published: Cambridge, UK: Cambridge University Press, 2020
Physical Description: 1 online resource (xvii, 345 pages)
Series: SSRC Anxieties of Democracy
Notes: Over the last five years, widespread concern about the effects of social media on democracy has led to an explosion in research from different disciplines and corners of academia. This book is the first of its kind to take stock of this emerging multi-disciplinary field by synthesizing what we know, identifying what we do not know and obstacles to future research, and charting a course for the future inquiry. Chapters by leading scholars cover major topics - from disinformation to hate speech to political advertising - and situate recent developments in the context of key policy questions. In addition, the book canvasses existing reform proposals in order to address widely perceived threats that social media poses to democracy.

SPACE WARFARE
Title: Space Threat Assessment 2020 [electronic resource]
Institution: Center for Strategic and International Studies (US)
Published: Washington : Center for Strategic & International Studies, 2020
Physical Description: 1 online resource (80 pages)
Notes: This report reviews the open-source information available on the counterspace capabilities that can threaten U.S. space systems and which countries are developing such systems. The report is intended to raise awareness and understanding of the threats, debunk myths and misinformation, and highlight areas in which senior leaders and policymakers should focus their attention. This report focuses on five specific countries that are either avidly pursuing counterspace capabilities or that present the greatest risk to the United States' National Security: China, Russia, Iran, North Korea, and India. A sixth section analyzes the counterspace capabilities of select other countries, including some allies and partners of the United States, and some non-state actors. This report is not a comprehensive assessment of all known threats to U.S. space systems because much of the information on what other countries are doing to advance their counterspace systems is not publicly available. Instead, it serves as an unclassified assessment that aggregates and highlights open-source information on counterspace capabilities for policymakers and the general public.

USA--FOREIGN RELATIONS
Title: Ideals, Interests, and U.S. Foreign Policy from George H. W. Bush to Donald Trump [electronic resource]
Author: Powaski, Ronald E.
Published: Cham, Switzerland : Palgrave MacMillan, 2019
Physical Description: 1 online resource (289 pages)
Notes: Includes index.
Notes: This volume discusses the presidential foreign policies of the post-Cold War era, beginning with George H. W. Bush and ending with the first 17 months of Donald Trump's presidency. During this period, the United States emerged from the Cold War as the world's most powerful nation. Nevertheless, the presidents of this era faced a host of problems that tested their ability to successfully blend realism and idealism. Some were more successful than others.

Media: eBook
Since the end of the Cold War, the global perception of the United States has progressively morphed from dominant international leader to disorganized entity, seemingly unwilling to accept the mantle of leadership or unable to govern itself effectively. The author argues that this transformation is the result of the failure of political leaders to understand the complexity of American power, its expansiveness, and its limitations. He makes clear that the successful exercise of power is not limited to the use of military might or the ability to coerce or demand submission, but must encompass as well diplomacy, economics, strategic communications, development assistance, intelligence, technology, ideology, and cyber. By analyzing specific challenges faced by the American government in the post-Cold War period - Iran, Iraq, Afghanistan, North Korea, Syria, Libya, Russia, China and others - the author deconstructs the ways in which leaders have used the instruments of power available to them. With forthright judgments of the performance of past presidents and their senior-most advisors, first-hand knowledge, and insider stories, he argues that U.S. national security in the future will require learning, and abiding by, the lessons of the past, and re-creating those capabilities that the misuse of power has cost the nation.

President Donald J. Trump's 'America First' outlook has inspired both enthusiasm and condemnation among different segments of the American population. This book examines the meaning and implications of that perspective, and how the Trump Administration has implemented it - or failed to do so. Contributors, subject-matter experts with diverse points of view, place the Trump Doctrine within the succession of presidential foreign policy themes, and provide a case-by-case analysis of how it has been applied in specific regions and countries around the world. The book's aim is to provide a fair and balanced assessment, relatively rare in this period of intense partisanship and impending national election.
USA--FOREIGN RELATIONS--CHINA
Title: Great-Power Competition and the Rising US-China Rivalry : Towards a New Normal ? [electronic resource]
Additional Author: Gaens, Bart, ed.
Additional Author: Sinkonnen, Ville, ed.
Institution: Finnish Institute of International Affairs (FI)
Physical Description: 1 online resource (216 pages)
Series: FIIA Report ; 66
Notes: The United States and China are posited to be at the epicenter of an emerging and – by most accounts – intensifying rivalry. This report delves into the theoretical underpinnings as well as the geostrategic and geo-economic dynamics driving this great-power competition. It explores future prospects for contestation and engagement in key issue areas, such as arms control, trade and sanctions. The chapters in this volume also examine the Indo-Pacific as the immediate regional frontline of the unfolding great-power contest and explore the role that Europe has to play in this game. As the world is crossing the threshold into a new age of great-power competition, the debate on the US-China rivalry reveals the complex and contested nature of the meanings, causes, policy implications and future prospects of what is set to become the 'new normal' in global politics.

USA--FOREIGN RELATIONS--MIDDLE EAST
Title: More than a Doctrine : The Eisenhower Era in the Middle East [electronic resource]
Author: Fowler, Randall
Published: Washington : Potomac Books, 2018
Physical Description: 1 online resource (xxxv, 233 pages)
Notes: Bibliography. Includes index.
Notes: Given on 5 January 1957, the Eisenhower Doctrine Address forever changed America's relationship with the Middle East. In the aftermath of the Suez Crisis, President Dwight D. Eisenhower boldly declared that the United States would henceforth serve as the region's 'protector of freedom' against Communist aggression. Eighteen months later the president invoked the Eisenhower Doctrine, landing troops in Lebanon and setting an enduring precedent for U.S. intervention in the Middle East. How did Eisenhower justify this intervention to an American public wary of foreign entanglements ? Why did he boldly issue the doctrine that bears his name ? And, most important, how has Eisenhower's rhetoric continued to influence American policy and perception of the Middle East ? The author answers these questions and more in this book. With the expansion of America's global influence and the executive branch's power, presidential rhetoric has become an increasingly important tool in U.S. foreign policy - nowhere more so than in the Middle East. By examining Eisenhower's rhetoric, the book explores how the argumentative origins of the Eisenhower Doctrine Address continue to impact us today.

WOMEN SOLDIERS--USA

Title: Gender Trouble in the U.S. Military: Challenges to Regimes of Male Privilege [electronic resource]
Author: Szitanyi, Stephanie
Published: Cham, Switzerland: Palgrave MacMillan, 2020
Physical Description: 1 online resource (xi, 204 pages)
Notes: This book investigates challenges to the U.S. military's gender regime of hetero-male privilege. Examining a broad set of discursive maneuvers in a series of cases as focal points - integration of open homosexuality, the end of the combat ban on women, and the epidemic nature of military sexual assault within its units - the author examines the contemporary link between gender and military service in the United States, and comprehensively analyzes forms of gendering produced by the military as an institution. Using feminist interpretivist methods to analyze an impressive combination of visual, textual, archival, and cultural materials, the book argues that despite policy changes since 2013 that may be positioned as explicit episodes of degendering, military officials have simultaneously moved to counteract them and reinforce the institutions gender regime of hetero-male privilege. Importantly, these (re)gendering processes continue to prioritize certain forms of service and sacrifice, through which a specific version of masculinity - the masculine warrior - is continuously promoted, preserved, and cemented.
